

## Mt. Senjo

### Overview

Mt. Senjo, 615 m in height, is situated east of Mt. Daisen and is home to a grassy plateau, steep cliffs, and a spectacular waterfall. During medieval times, this mountain teemed with mountain ascetics. Mt. Senjo is also associated with a famous fourteenth-century historical event that involved the imperial court and the Kamakura shogunate, which had been in power since 1185.
