

### **View to a Bridge**

Amagusuku viewpoint is around 15 minutes' walk to the west of Aka Harbor on Aka's southern tip. The view takes in Aka Harbor, the Aka Ohashi Bridge, and the islands of Geruma and Fukaji. Immediately in front is the curiously shaped Sakubaru rock cluster, a popular diving spot which is attached to Aka Island by a sand spit at low tide. The plant life in the nearby woods is interesting, with flat lemon, Okinawa pines, Kerama azaleas, bayberries, and Okinawa oleanders. This is an excellent spot from which to enjoy the sight of the setting sun.
