

## **Fourth Floor**

### **Windows for Venting Smoke**

Platforms along the walls of this floor served as perches for gunners. Small windows near the ceiling vented smoke from the matchlock guns, to improve visibility during a siege.

### **Firing Platforms**

Platforms along the walls allowed defenders to keep watch and fire on attackers through the high windows.

### **Take A Closer Look**

Assembly instructions for some of the keep's framework were carved directly into the timbers.
