

Japanese-style Bathroom

Overview

This bathroom was renovated during the Renovations in the Showa era (1980-1982) using iron plates and baseboards taken from under the floor.

Floor

Duckboards are laid on the artificial-stone floor, which matches the walls.

Walls

The walls are covered with the same artificial stone as the floor.

Ceiling

This arch-shaped ceiling has the same structure as that in the adjacent Western-style bathroom.
