

Soy Sauce Factory Tours (Ono)

Soy sauce has long been produced in Ono. The soy sauce from this area is known for its balance of sweet and salty flavors.

Yamato Koji Park includes a factory, shop, restaurant, and museum. Visitors can tour the former factory to see its traditional production methods and tools, including the huge barrels where soy sauce was fermented. Try soy sauce-flavored ice cream or a lunch featuring fermented foods.

Naogen, another soy sauce company in the area, offers factory tours. It operates a cafe and shop selling various soy sauce-related items, such as salad dressings, rice crackers, and candies.
