

Cautionary Points for Safely Using Trains

When on a platform

- ✓ Do not run or swing items around on the platform, and take care of the movements of people around you.
- ✓ Walk inside the white or yellow lines (nearer the center of the platform).
- ✓ Do not rush on or off the train when the signal has been given to close the doors, or the doors are closing. Wait for the next train.
- ✓ Never go down onto the tracks.

White and yellow lines

When on a train

- ✓ Dangerous items must not be taken onto the train. Urgently notify a nearby station staff member if you notice something or someone suspicious.
- ✓ When near the train doors, do not lean on the doors, put your hands or feet on them, or lean objects against them.
- ✓ The train is equipped with fire extinguishers. Should a fire break out while the train is moving, don't hesitate to use it to put out the fire quickly.

When at a level crossing

- ✓ Some level crossings do not have barrier arms and warning bells. Always check for safety that there are no oncoming trains before entering a level crossing.
- ✓ When entering a level crossing in a vehicle, first check there is enough space before and after the crossing to pass through safely.
- ✓ If you are trapped on a level crossing in a vehicle, escape by driving forward and pushing against the barrier arm to lift it out of the way.

When around railroad tracks

- ✓ Railroad tracks are not roads. Entering or passing through the tracks other than at level crossings is prohibited.
- ✓ Throwing stones at trains, placing stones on the tracks, or writing graffiti on the station or train are prohibited. Contact the station staff or police if you see anyone doing such actions.
