Providing Services

We are a comprehensive consulting company for urban planning in Japan. Having handled large-scale development projects of Urban Renaissance Agency (UR) for many years, our greatest strength is our “technology and organizational strength,” which can provide an overall support to a wide range of fields, from tangible aspects such as infrastructure and buildings to intangible aspects such as sales and maintenance. Moreover, our “accumulated wisdom and experience” support in creating business solutions in various areas. We provide broad scope of services not only for the government agencies but also for private companies.

- Community development / urban renaissance consulting
(Consulting services on urban planning, environment, civil engineering, construction, architecture, structure, design, quantity survey, etc)
- Client Support
(Various service undertakings including land acquisition, site compensation, construction supervision, sales and management)
- Asset Utilization/ Real Estate Sales Support/ Living Support
(Residential and commercial land sales, promotion of housing opportunities for rental housings, attraction of enterprises, sales promotion activities and establishment of advertising tools)
- Revitalization of Apartments and Housing Complex
(Renovation of aged housings, reconstruction and rejuvenation of apartments)

Project Achievement / Technical Expertise

As a group company of UR, UR Linkage is a company that supports comprehensive development of communities and housings for large-scale urban development projects in Japan, through a broad scope of services ranging from project planning/concept planning stage, actual planning/design stage, quantity survey/construction/supervision stage, and to sales/management stage. While at the same time, by cooperating with Japanese government agencies, UR Linkage has long been providing operation management of working groups of "Japanese Conference for Overseas Development of Eco-Cities (J-CODE)", in which we provide support in developing and promoting projects and conducting studies to promote Japanese companies to expand their business to emerging countries such as ASEAN regions. Following are some example of our domestic and international projects.

Tama New Town District (Tokyo - The largest scale of new town development in Japan)

Minato Mirai 21 District (Kanagawa – Urban new town on reclaimed land)

Tsukuba Science City (Ibaraki – The sole city for research and education in Japan)

Bang Sue District (Thailand, Bangkok – Development of large-scale master plan at former factory site)
